

WorkforceIQ Quick Start Guide

Use this two-page guide to get productive quickly. Filters change every card, chart, table, and explanation.

Six Dashboard Sections

Pulse: where to focus first.

Flow: receipts, closures, throughput, and backlog.

Staffing: FTE, production, and capacity.

Forecast: directional outlook and scenarios.

Intelligence: early warnings and drivers.

Executive KPI Cards

Capacity: shortfall, sufficient, or surplus.

SLA Health: selected-context SLA vs 90% target.

Backlog: positive means closures exceeded receipts.

Operational Health: count of areas needing attention.

Outlook: projected direction and

Basic Filter Pattern

1. Choose Dashboard View.
2. Select Business Unit.
3. Select Work Category.
4. Select Period.
5. Click rows/cards for detail.

Throughput Balance

Throughput Balance = Closures - Receipts.
Positive is favorable because completed work exceeded incoming work. Negative means incoming work exceeded completed work, so backlog pressure is growing. A department can have enough capacity to keep pace with receipts and still have backlog if prior inventory has not been burned down.

Which Dashboard View Should I Use?

Are we healthy?

Use Pulse.
Review attention rows, business-unit health, and KPI cards.

What if work or staffing changes?

Use Forecast.
Use FTE, workload, productivity, and backlog target scenario controls.

Is backlog growing?

Use Flow.
Check Throughput Balance and burn-down runway.

Why is pressure forming?

Use Intelligence.
Review early warnings and driver explanations.

Do we have capacity?

Use Staffing.
Review department FTE, production/receipts, and capacity gap.

What are the actual source values?

Use Detail.
Review Source SLA, Calculated SLA, inventory, OOS, receipts, closures, balance, and FTE.

What happens next?

Use Forecast.
Select one BU and work category; review chart, table, crossover, and SLA.

How do I brief leadership?

Use Pulse + Rail.
Use Pulse for status and the Intelligence Rail for why it matters and recommended lever.

Compact Metric Reference

SLA Service-level performance; target is 90%.

OOS Out-of-standard inventory.

Receipts Incoming work.

Closures Completed work.

Inventory Backlog/work on hand.

Crossover Projected closures begin exceeding receipts.

N/A Needed source data is unavailable for the selected context.
